

LAB OBSERVATION

CSA1522-CLOUD COMPUTING AND BIG DATA
ANALYTICS

Student name: G. Manobhi ram

Register number: 192311322

EXPERIMENT 1:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR FLIGHT BOOKING RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To Create a simple cloud software application for Flight Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP1:

Log into zoho.com

STEP 2: Create new application from scratch

The image shows the 'Create from scratch' form in Zoho Creator. At the top, there are three icons: a blue circle, a white square, and a white square with a plus sign. Below these icons is the text 'Create from scratch'. The form has a light purple background. It contains a label 'Application Name' with a red asterisk, followed by a text input field containing 'Flight Reservation System'. Below the input field is a checkbox labeled 'Enable Environment' with a link 'Learn More' in blue. At the bottom of the form is a large blue button labeled 'Create Application'.

STEP 12: Create and display the Dashboard with important information and charts from the collected data.

EXPERIMENT 2:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR PROPERTY BUYING & RENTAL PROCESS IN CHENNAI CITY USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Property Buying and Rental Process in Chennai City using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP 1: Log into zoho.com.

STEP 2: Create a new application from scratch in Zoho Creator.

The image shows the 'Create from scratch' form in Zoho Creator. At the top, there is a header with a blue circle icon and a plus sign, and the text 'Create from scratch'. Below this, there is a section for 'Application Name' with a red asterisk indicating it is required. The text 'Chennai Property Hub' is entered in the input field. Below the input field, there is a checkbox labeled 'Enable Environment' followed by a link 'Learn More'. At the bottom of the form, there is a large blue button labeled 'Create Application'.

STEP 3: Create a new application and create forms from scratch.

STEP 4: Create Property Form.

STEP 5: Create Customers Form.

The screenshot shows the 'Chennai Property Hub' interface for creating a 'Customers' form. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a 'Done' button.

Basic Fields: This section contains a grid of field types on the left and a list of fields on the right. The field types include Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The fields listed are Customer ID, Customer Name, Gender, Mobile Number, Email, Address, Preferred Property Type, and Status.

Field Properties: This section shows the configuration for the 'Customer ID' field. It includes the following properties:

- Field name: Customer ID
- Field link name: customer_id
- View Field References: A link to view references.
- Validation: Start index: 1
- Appearance: Field type: Text

STEP 6: Create Property Search Form.

The screenshot shows the 'Chennai Property Hub' interface for creating a 'Property Searches' form. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a 'Done' button.

Basic Fields: This section contains a grid of field types on the left and a list of fields on the right. The field types include Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The fields listed are Buy or Rent, Property Category, Preferred Location, Budget Range, Bedrooms, Furnishing, and Customer.

Field Properties: This section shows the configuration for the 'Buy or Rent' field. It includes the following properties:

- Field name: Buy or Rent
- Field link name: buy_or_rent
- View Field References: A link to view references.
- Choices: Advanced. Renaming the choices will update the values in the existing records, if any. The choices are Buy and Rent.

STEP 7: Create Rental Agreement Form.

The screenshot shows the 'Chennai Property Hub' interface for creating a 'Rental Agreements' form. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a 'Done' button.

Basic Fields: This section contains a grid of field types on the left and a list of fields on the right. The field types include Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The fields listed are Customer, Property, Agreement Start Date, Agreement End Date, Monthly Rent, Security Deposit, and Agreement Status.

Field Properties: This section shows the configuration for the 'Customer' field. It includes the following properties:

- Field name: Customer
- Field link name: customer
- View Field References: A link to view references.
- Display Fields: Chennai Property Hub → Customers. The field 'Customer ID' is selected.
- Display type: Multi Select

The footer of the interface includes a trial expiration notice: 'Trial expires in 14 days | Upgrade | Get started faster! | Help'.

STEP 8: Create Property Bookings forms.

The screenshot shows the 'Property Bookings' form builder in the Chennai Property Hub. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a central form preview.

- Basic Fields:** A grid of field types including Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date.
- Field Properties:** A panel on the right showing the configuration for the selected 'Customer' field. It includes fields for 'Field name' (Customer), 'Field link name' (customer), and 'Display type' (Multi Select).
- Form Preview:** The central area shows the form being built, with fields for Customer, Property, Buy or Rent (radio buttons), Booking Date, Advance Amount, Total Property Value, and Booking Status.

STEP 9: Create Feedback Form

The screenshot shows the 'Feedbacks' form builder in the Chennai Property Hub. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a central form preview.

- Basic Fields:** A grid of field types including Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date.
- Field Properties:** A panel on the right showing the configuration for the selected 'Customer' field. It includes fields for 'Field name' (Customer), 'Field link name' (customer), and 'Display type' (Multi Select).
- Form Preview:** The central area shows the form being built, with fields for Customer, Property, Rating, and Comments.

STEP 10: Add sample data to all the created forms.

The screenshot shows the 'Property Bookings' form in the Chennai Property Hub, filled with sample data. The form is displayed in a dark-themed interface with a sidebar menu.

- Customer:** 1 x
- Property:** 4 x
- Buy or Rent:** ☒ Buy, ☐ Rent, ☐ Other
- Booking Date:** 28-Jul-2026
- Advance Amount:** 20000
- Total Property Value:** 100000
- Booking Status:** Confirmed

Buttons for 'Submit' and 'Reset' are visible at the bottom of the form.

STEP 11: Create reports to display the data entered in the respective forms.

Chennai Property Hub

STEP 8: Create Feedback Form.

The screenshot shows the 'Feedbacks' form creation interface. On the left, a 'Basic Fields' panel contains icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The central workspace shows a search bar with 'Student' and three input fields: Rating, Comments, and a circular icon with '2/4'. On the right, the 'Field Properties' panel shows 'Field name' as 'Student', 'Field link name' as 'student', and 'Display type' as 'Drop Down'. The bottom status bar indicates a trial expires in 14 days and includes links for Upgrade, Get started faster!, and Help.

STEP 9: Create Rank List Form.

The screenshot shows the 'Rank Lists' form creation interface. The 'Basic Fields' panel is the same as in the previous step. The central workspace shows a search bar with 'Student' and three input fields: Percentage, Rank, and Academic Year. The 'Field Properties' panel on the right shows 'Field name' as 'Student', 'Field link name' as 'student', and 'Display type' as 'Drop Down'. The bottom status bar is identical to the previous screenshot.

STEP 10: Add sample data to all the created forms

The screenshot shows the 'Subjects' form in the SIMATS Mark Sheet Processing System. A dark sidebar on the left contains navigation links: Dashboard, Marks, Mark Sheets, Feedbacks, Subjects (selected), Subjects Report, Rank Lists, and Students. The main area is titled 'Subjects' and contains input fields for Subject Code (CSA15), Subject Name (cloud computing), Semester (2), Credits (6), and Faculty Name (Dr.Rajaram). At the bottom are 'Submit' and 'Reset' buttons. The user 'Kanmani Log...' is logged in at the bottom left.

STEP 11: Create reports to display the data entered in the respective forms.

STEP 12: Create and display the Dashboard with student marks, average, percentage, rank, and overall performance.

EXPERIMENT 7:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR STUDENTS ATTENDANCE SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To create a simple cloud software application for Students Attendance System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP 1: Log into zoho.com.

STEP 2: Create a new application from scratch in Zoho Creator.

The image shows the 'Create from scratch' form in Zoho Creator. At the top, there is a header with a blue and white icon and the text 'Create from scratch'. Below this, the form has a section titled 'Application Name' with a red asterisk indicating it is required. The text 'Students Attendance Management System' is entered into the input field. Below the input field, there is a checkbox labeled 'Enable Environment' followed by a link 'Learn More'. At the bottom of the form, there is a large blue button with the text 'Create Application'.

STEP 3: Create a new application and create forms from scratch.

STEP 4: Create Student Form.

STEP 5: Create Course Form.

EXPERIMENT 8:

CREATE A SIMPLE CLOUD WEB APPLICATION FOR STUDENT COUNSELLING SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To create a simple cloud web application for Student Counselling System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP 1: Log into zoho.com.

STEP 2: Create a new application from scratch in Zoho Creator.

A screenshot of the "Create from scratch" form in Zoho Creator. At the top, there are icons for creating an application from scratch (a circle and a square) and from a template (a circle and a plus sign). The text "Create from scratch" is centered. Below this, the "Application Name" field is required, indicated by a red asterisk. The text "Student Counselling System" is entered in the field. There is an unchecked checkbox for "Enable Environment" with a "Learn More" link. A large blue "Create Application" button is at the bottom.

STEP 3: Create a new application and create forms from scratch

STEP 4: Create Student Form.

STEP 5: Create Academic Details Form.

STEP 6: Create Recommendations Form.

STEP 7: Create Domain Interest Form.
